ABOUT ME

Frontend Developer with a BSc (Hons) in Computer Science and hands-on experience building responsive web applications using React, JavaScript, TypeScript and REST APIs. Passionate about creating clean, modern and user-friendly interfaces with strong attention to performance and usability.

WORK EXPERIENCE

2025-NOW

FREELANCE FRONTEND DEVELOPER

Frontend developer

- Develop responsive web applications using React and modern frontend technologies.
- Build clean and interactive user interfaces focused on usability and performance.
- Integrate REST APIs and create scalable frontend solutions.
- Collaborate with clients to deliver projects according to requirements and deadlines.

ASSISTANT MANAGER

2022-2026

admiral Slots

- Managed daily operations and team performance.
- Supervised staff and maintained service standards.
- Resolved customer issues efficiently and professionally.
- Trained and supported new team members.
- Ensured compliance with company procedures and operational policies.

PROJECTS

WORKAPP

Employee management platform built with React, Bootstrap and Vite. Features employee records, schedules, holidays, absences, medical leave, overtime tracking, reporting and responsive dashboard management.

CONVERTO

Responsive conversion platform built with HTML, CSS, JavaScript and Bootstrap. Features real-time currency exchange rates through external APIs, unit conversions for length, weight, temperature and area, searchable categories, conversion history and a mobile-first user experience.

HIRETRACK

Modern job application tracking platform built with React. Allows users to manage applications, monitor interview stages, track application progress and organize job opportunities through a responsive dashboard focused on productivity and user experience.

RENTAL CARS

Car rental platform built with HTML, CSS and JavaScript. Features vehicle browsing, rental booking forms, price calculation, user authentication, location selection and a responsive multi-page experience designed for car rental services.

Additional projects, live demonstrations and source code repositories are available on my portfolio website:
